# React Native

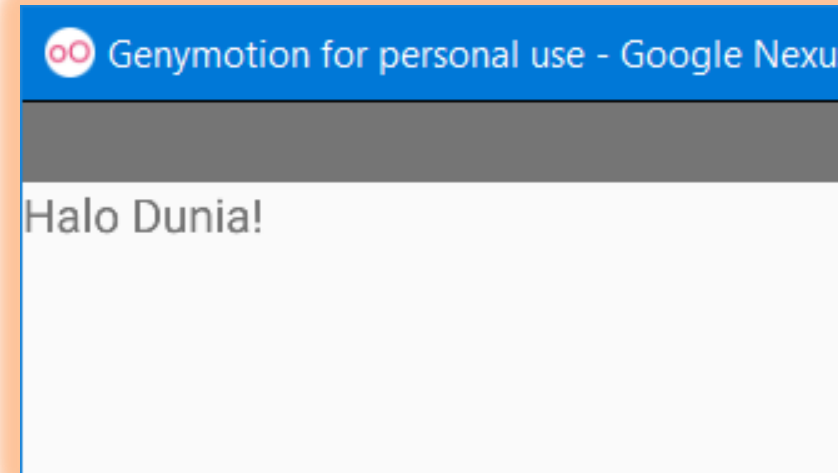

**#3** Basic Components

# View & Text

```
import React, { Component } from 'react';  
import { Text, View } from 'react-native';
```

```
var kalimat = 'Halo Dunia!';  
class App extends Component {  
  render() {  
    return (  
      <View>  
        <Text>  
          { kalimat }  
        </Text>  
      </View>  
    );  
  }  
}
```

```
export default App;
```

# Activity Indicator

```
import React, { Component } from 'react';
import { View, ActivityIndicator } from 'react-native';

export default class App extends Component {
  render() {
    return (
      <View>
        <ActivityIndicator size="large" color="red" />
        <ActivityIndicator size="small" color="yellow" />
        <ActivityIndicator size="large" color="green" />
        <ActivityIndicator size="small" color="blue" />
      </View>
    );
  }
}
```

```
import React, {Component} from 'react';  
import {View, Image} from 'react-native';
```

```
class App extends Component {  
  render() {  
    return (  
      <View style={{flexDirection: 'row',  
        justifyContent: 'center'}}>  
        <Image  
          style={{width: 250, height: 250}}  
          source={require('./gbr/lin1.png')}  
        />  
      </View>  
    );  
  }  
}  
  
export default App;
```

```
import React, {Component} from 'react';
import {View, Image} from 'react-native';

class App extends Component {
  render() {
    return (
      <View style={{flexDirection: 'row',
        justifyContent: 'center'}}>
        <Image
          style={{width: 250, height: 250}}
          source={{uri: 'https://...barca.png'}}
        />
      </View>
    );
  }
}

export default App;
```

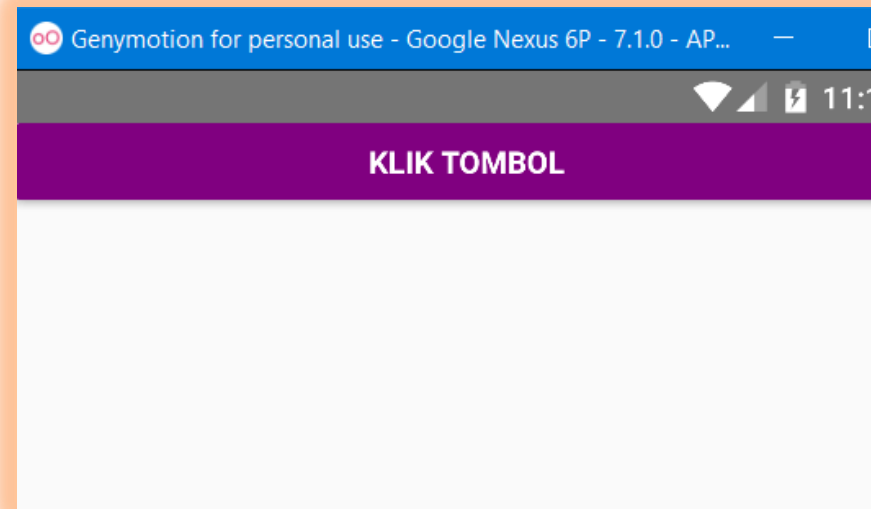

# Button

```
import React, { Component } from 'react';  
import { Button } from 'react-native';
```

```
class App extends Component {  
  render() {  
    function klik(){}  
    return (  
      <Button  
        onPress={klik}  
        title="Klik Tombol"  
        color="purple"  
      />  
    );  
  }  
}
```

```
export default App;
```

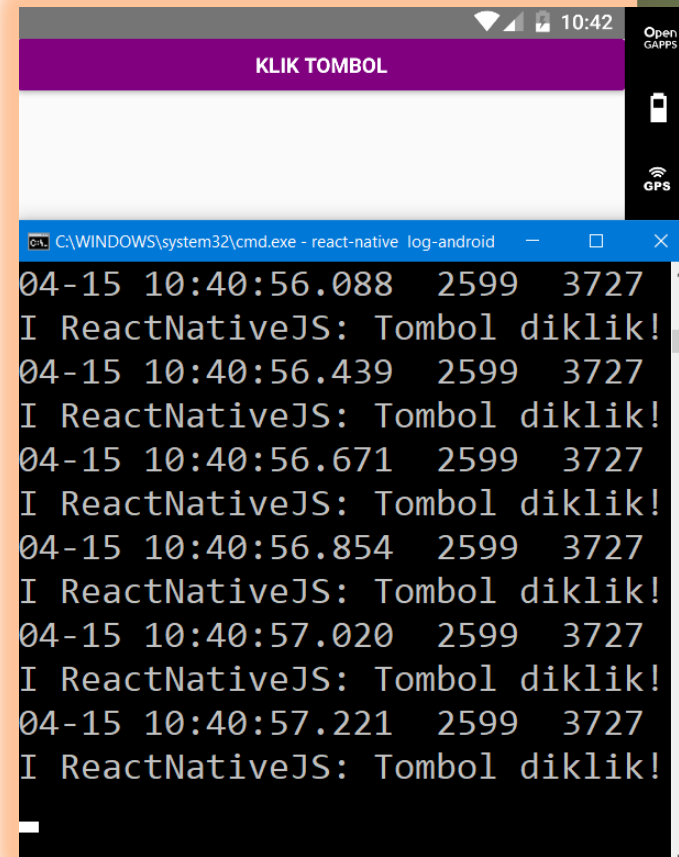

# Button

## #console.log

```
import React, { Component } from 'react';
import { Button } from 'react-native';
```

```
class App extends Component {
  render() {
    function klik(){
      console.log('Tombol diklik!')
    }
    return (
      <Button
        onPress={kl}ik}
        title="Klik Tombol"
        color="purple"
      />
    );
  }
}
```

```
export default App;
```

# Button #Alert

```
import React, { Component } from 'react';
import { Button, Alert } from 'react-native';
